Dear Sir or Madam,

The Warren County Soil and Water Conservation District is offering the 2019 Arbor Day Tree Planting Program. This program will provide one 5-6 ft. tree to schools and organizations. The program will discuss the importance of trees, include a brief history of Arbor Day and will conclude with the planting of your choice of a Sugar Maple or White Spruce. These Arbor Day plantings should take place in May 2019.

Sugar Maple (*Acer saccharum*) is the New York State tree and is characteristic of our broadleaf forests. This species grows best in deep, fertile, moist – well drained soils. It is shade tolerant and has a spectacular autumn color, which makes it a popular landscaping tree. Boiling the sap of this tree to make syrup is a popular hobby and business in our area.

White Spruce (*Picea glauca*) prefers moist, well-drained soils and is a shade tolerant evergreen. Besides this species being widely used across Canada for pulpwood and lumber, its wide distributions provides habitat for wildlife across North America. Being a softer needle conifer than other spruces, White Spruce is a great yard tree.

Applications are due by April 12th, 2019. Please provide us with a brief explanation of your proposed project and show that you have the capability of completing the project. Applications will be evaluated for completeness. Successful applicants will be notified following the April SWCD Board meeting.

If you are interested please call our office at 518-623-3119 or contact Dean Moore dmoore123@nycap.rr.com or Maren Alexander at marenalexander@nycap.rr.com. We look forward to recognizing the importance of Arbor Day with you!

Sincerely,

Dean Moore
Senior District Technician
