

Invasive Plants of the Lake George/Lake Champlain Basin

Learn about the top invasive plant threats to Lake George and the region in a free online webinar, which will be held the following dates:

Aug. 28, 2020 12 -1:30 PM

Sept. 14, 2020 6 - 7:30 PM

Sept. 28, 2020 6 - 7:30 PM

Invasive species are an ecological threat to our lands and waterbodies, and to local industries such as forestry, farming, and tourism.

The free online webinar will cover how to use the invasive mapping program iMapInvasives; and the identification, removal techniques, management timelines, and spread prevention of forest, riparian, and aquatic invasive plants that are found in the region. You will leave with the tools and information needed to manage invasive species on your own property,

**To register for a webinar date and receive
the Zoom link please email
mdore@lglc.org**

Bonus! The first 60 registrants will receive their own free Scouting and Restoration Tool-Kit!
