MS4 Warren County

Illicit Discharge Report:

Within thirty (30) days of an illicit discharge, the MS4 Operator must document each report of an illicit discharge in the SWMP Plan with the following information:

a) **Date of the report**: 04.02.2025 at 3:30PM (reported to Warren County MS4)

b) **Location of the illicit discharge**: 308 Quaker Road Queensbury, Streeters Automotive roadway/driveway and Warren County grassed ditch on Quaker Road

c) **Nature of the illicit discharge**: NYSDEC Spills Response Program (Andrew Frank) thinks it may be hydraulic fluid

d) **Follow up actions taken or needed (including response times)**: Kevin Hajos and Jess Barton of Warren Co. DPW picked up chemical absorbent logs and pads from Warren Co. SWCD to take to the spill location and inspect it at 4:00PM on 4/2

4/4 the pavement was cleaned with speedi-dry by the DEC Contractor

4/9 DPW and the DEC contractor will be working together on the cleanup. The crew will clean and excavate the ditch line.

e) **Inspection outcomes and any enforcement taken**: NYSDEC Spills Andrew Frank is asking businesses in the area if they have cameras to find out how the spill occurred. DEC contacted a contractor to hopefully get the spill cleaned up on 04.03.2025.
